Freelance

Senior Frontend Engineer

December 2024 — Present

- Collaborated with Set Reset to deliver a reliable, high fidelity 3D interactive installation for S&P Global.
- Led development of an asset pipeline that automated the processing of large amounts of 3D content.
- Built polished, dynamic frontend interfaces for games and web applications.

Framer

Product Engineer

June 2022 — December 2024

- Designed and developed the font previews feature, from initial hackathon concept to fullstack production ready feature.
- Led the engineering work to integrate Fontshare typefaces. Managed communication and coordination with the external development team.
- Played a key role in launching the Plugins platform, designing and implementing core APIs, and creating the OAuth model for plugins.
- Shipped multiple high quality product features relied upon daily by thousands of users to run their businesses.

BBC iPlayer

Senior Software Engineer

June 2018 — June 2022

- Led development and technical direction for the homepage content item redesign. This included a versatile and accessible "hover card" system used across iPlayer.
- Initiated and led the work on bringing a legacy image optimization system up-to-date using Docker, enabling future work on portrait content images.
- Mentored graduate and junior software engineers and initiated knowledge sharing sessions for the team.
- Maintained Jenkins CI/CD pipelines and AWS infrastructure.
- Collaborated with team members to create high quality code following TDD and pair programming best practices.
- Shipped performant and accessible web applications used by millions of people per week using React, Redux and CSS.

Signal Noise

Frontend Developer

June 2013 — October 2017

- Worked closely with designers to create single page web applications for clients including The Guardian, eBay and Alzheimer's Society.
- Developed, maintained and shipped real-time data visualisations for conferences and exhibitions.
- Created and animated interactive data visualisations using Canvas, SVG and WebGL.

Side projects

I maintain few small projects with small user bases. These include Salad Room, Powerlet and Little Camera Preview.
