

# Anthony Cossins

## Front-end Developer

Front-end developer with a background in design. Specialises in creating user interfaces for web applications and sites that are polished, user-friendly and accessible.

[anthonycossins@gmail.com](mailto:anthonycossins@gmail.com)

### Employment

#### June 2018 - Present

Software Engineer  
BBC iPlayer

- ✓ Iteratively develop features based on working closely with UI/UX, attending user interviews and data from A/B testing. And ensure they are 100% accessible to every possible user in the UK.

#### December 2017 - January 2018

Developer and Designer  
Freelance

- ✓ Designed and developed multilingual site for a target audience based in mainland China. Animated illustrations for the site in code. Helped with content architecture to make it structured and accessible.

#### June 2013 - October 2017

Front-end Developer  
Signal-Noise

- ✓ Communicated with clients and designers to create single page web applications. Used Backbone, Laravel, Node.js and React.
- ✓ Developed and maintained the redesigned Signal Noise website using Craft. Focused on improving the user experience for content creators.
- ✓ Developed, maintained and deployed real-time data visualisations on for global conferences. Made on site visits to get user feedback.
- ✓ Programmed and animated wide range of interactive visualisations using HTML5 canvas and SVG.

### Skills

#### Experience

JavaScript (ES6), HTML, CSS/SASS, Node.js, PHP, UX & UI Design

#### Libraries and frameworks

React, Redux, Electron, GSAP, Mocha, Laravel

#### Tools

Git, Webpack, NPM, JIRA, Sketch, Photoshop, Illustrator

#### Content management

WordPress, Craft CMS, Kirby CMS, Jekyll

### Interests

Taking pictures all the time, street photography and abstract stuff.

Record and collect sounds on my sampler SP-404. Use them to create interesting (but mainly horrible) experimental noise from it.

Prototyping with electronics using the Raspberry Pi, Arduino and Particle Photon.
